Abstract: - Modern scientific knowledge perceives a biofield of the person mainly as biopower, tied, mainly, to functioning of a biological body, in general, and its separate bodies and cages, in particular, that is connected with power radiations of bodies and cells of a biological body. Ideas of processes of change of frequency ranges of power radiations of the person in the course of his spiritual ascension intensify development of the corresponding methodologies of a pilot study of the mental power phenomena.

Keywords: - biofield, spectral analysis, research technique, mental power component.

Introduction:

Mental energy — the term, is offered by S. Freud for the description of specifics of movement of attention, interest and attachment from one object (or the current activity) on another. In definition — Moore Fayna mental energy is the cornerstone of any activity of the mental device and all mental manifestations.

Power basis of activity of all people one. Programs of behavior of any person are formed by reason and are implemented by mental energy. Soul is filled with mental energy.

Mental energy reaches each section. Mental tool energy provides the movement of blood, functioning of an organism and through nervous and muscular system forms behavior of the person in his activity.

The main functions of mental energy are divided into two groups: motivational and tool. The motivational group is formed as accumulation of the mental energy of a biofield, in the form of the detainee remaining capable to make work. Tool function serves for realization of various mental processes.

1. The mental power component of biofield

The mental power component of biofield of the person is formed by these or those motivations activating in the course of activity, emotions, thoughts, strong-willed impulses, etc., each of which at activation radiates waves of a certain power spectral and color frequency. To each power spectral and color frequency there corresponds, quite certain mental energy. It is known that the mental power radiations which are shown in a biofield of the person at activation in it congenital animals (biological and physiological) instincts and motivations tied to them, emotions and thoughts, are characterized by lower power spectral and color frequency of vibrations, and to them there corresponds more dark color spectral scale: dark gray, gray-brown, brown and others muddy infrared tone. The mental power radiations arising in a biofield of the person at activation of the motivations, emotions and thoughts induced by prisoners in mental nature of the light, conscientious party of its spiritual nature – intimate super conscious levels of its spirit – high frequency also belong to the range ultra-violet spectral color: violet, blue, blue, golden-yellow, red, pink, ruby, silver-white colors. Respectively, the person from

the expressed animal and instinctive prepotent has more low-frequency and more darkened, in the spectral and color relation biofield. The person from the expressed his superconscious prepotent spiritual nature has more high-frequency, shining in bright iridescent ultra-violet spectral flowers.

Therefore, with strengthening and the beginning of domination in the person of the light, conscientious party of his nature, in the range of its mental power radiations more high-frequency ultra-violet radiations will begin to amplify and prevail, i.e. the phenomenon of shift of frequencies of mental power radiations of the person towards more high-frequency ultraviolet spectrum has to take place. And with strengthening and the beginning of domination in the person of the low animal and instinctive party of his congenital dual mental nature – the phenomenon of shift of frequencies of its mental power radiations towards more low-frequency infrared zone of a range has to take place.

The pilot study of the phenomena of ultra-violet and infrared shift of frequencies of mental power radiations of the person in the course of his spiritual ascension (evolution) or degeneration (involution), respectively, is the major task facing modern natural sciences which research and the decision is already quite feasible by means of modern high technologies. Experimental confirmation of reliability of these phenomena – already in itself is a substantial contribution to natural-science justification of reliability of these basic provisions of diagnostics of a biofield.

The spectral analysis of mental power radiations of the person allows to diagnose, along with a condition of his biological health, and a condition of its spiritual development and a spiritual state. The method of the combined spectral and frequency analysis can define – whether low-frequency radiations, or ultrahigh-frequency radiations of the highest levels of spirituality dominate in a range of power radiations of a biofield of the person. Concrete spectral and frequency characteristics and approaches to their measurement are important for definition of a condition of spiritual development of the person [1-5].

2. Color range of biofield and ability of the person

The biofield forms a power aura, shine of a body of the person which is created by his power. The luminescence of a biofield or shine of aura is formed due to work of the power centers of the person. The range of energy filling a biofield reflects in itself all information on the person, a condition of a present situation and information on states last. Can determine by a luminescence and a form of a biofield what power prevails in the person what power centers work stronger and what function poorly. It is possible to determine by shine in what state and mood there is a person whether he is healthy. Also negative impacts on the person are determined by a luminescence of a biofield of the person. In ideal option at the harmonious spiritually developed person the biofield has 7 layers. On number of the main working power centers. But in practice such people meet extremely seldom. Most of people functions on 2 – 3 types of energy, not to seek for self-development and increase in abilities and energy and is limited to the minimum set of energy. Each layer of a biofield is a possession of a certain type of energy and respectively certain tendencies, abilities and opportunities.

Energy of a biofield it is shown in the form of light and color. Color, its brightness and arrangement of energy indicate physical, emotional, mental and spiritual health of the person. It is possible to visualize color scale of a biofield the spectral analysis or a photo visualization.

Various colors reflect various qualities of the person and different types of energy of a biofield. Colors can be shown in various forms, shades and provisions, including in the form of the color layers which are softly passing each other. To learn to distinguish these shades, time and practice is required. To understand and define value of every color the technique of definition of compliance to it of quality of the person is entered.

Let's consider general information about primary colors in connection with the energy reflected by them. Visualization helps to recognize by flowers of quality, ability and a condition of the person.

Red color of a biofield appears at big physical activities, at muscular activity, at physical overfatigue or at negative psychological states: aggression, a condition of a severe stress, a fright or rage, testifies to negative serious condition, to reflection on negative subjects. Red color reflects love inclination, anger, hatred, and its muddy indicates excessive irritation, demonstrating nervousness, irascibility, aggression, impulsiveness or sincere nervousness.

Pink color of a biofield is formed by the emotional excitement, a state which is adjusted on communication, an emotional positive state. Pink color is color of mercy, love and purity. It can reflect joy and tranquility and also well developed feeling of solidarity. When at a biofield there is pink color, it demonstrates that the person differs in quiet temper, modesty, loves art and all fine. Muddy shades of pink color indicate immaturity and underdevelopment.

Yellow color – color of mind, reasonings, thought processes, focus on any business. Yellow is color of intellectual activity and cheerfulness. Softer shades often tell about the enthusiasm which arose in connection with some vital events about force of imagination and spiritual development (especially transition from light yellow to white). Yellow is color which embodies itself (himself) force of thoughts. More dense and muddy shades of yellow can reflect intensive process of thinking and the analysis and also excessive criticality, feeling of non-recognition and tendency to dogmatism.

Gold yellow color of the restoring power bearing health and integrity.

Gold color indicates active spiritual energy and finding of the truth. It reflects the highest energy of love and harmony. More muddy shades of gold indicate that the person for the present is in process of awakening of the highest inspiration.

Green, gently green color of warm experiences, demonstrates that the person takes everything very much to heart - responsibility, commitment, personal experiences, thoughts and care of the family. Green is color of responsiveness and compassion. It reflects development, empathy and tranquility. It is color of friendliness. Muddy or dark

shades of green demonstrate indecision and avarice, jealousy and self-love. They point to disbelief in own forces and suspiciousness.

Blue color of mental energy of creativity, positive mental energy. People with blue color possess strong mentality and nervous system, rich imagination and strongly developed figurative thinking.

Blue color demonstrates will of the person. Blue color of tranquility and silence. It reflects devotion, sincerity and gravity. Light shades of blue color speak about active imagination and a good intuition. More dense of tone of blue color point to lifelong search of the Divine, demonstrating religiousness. Bright blue shades indicate honesty and judiciousness. Muddy shades of blue reflect block of perception, timidity, forgetfulness.

Orange color is color of warm warmth, creative creation. He points to courage, joy and sociability. Muddy shades of orange color reflect pride and arrogance and also vanity.

Gray color indicates the movement to disclosure of internal abilities. The shades of gray color close to silvery color reflect inspiration, an intuition and creative imagination. Dark shades of gray color demonstrate reserve of the person and about his belonging to type of so-called lone wolves.

Brown color shows desire to be improved, about such qualities as diligence and systemacity.

Black is color of protection. It is color which specifies that the person has secrets.

Violet color testifies to high degree of an intuition, ability to use spiritual energy. Violet color of association of heart and reason, physical and spiritual. It reflects independence and an intuition and also indicates the dynamic and well developed imagination. It is the sign of the person who is in search. Purple shades demonstrate ability is realistic and prudently to treat affairs. More pale and light tone of violet and purple color point out humility and spirituality. More dark and muddy shades signal about tendency to superiority over others, indicate the need for sympathy and experiences concerning misunderstanding from other people.

The white sparkling color demonstrates sanctity of the person. White color reflects the truth and purity. He points to what energy of the person is capable to clean and improve. Besides, it testifies to creative potential.

These are the primary colors speaking about work of the power centers and a condition of a biofield of the person. Actually shades of flowers of energy of a biofield and options of their set huge set. To understand what happens to the person what power prevails whether the power centers correctly work. Whether there are no hidden problems, threats, leakages of energy, it is necessary to carry out the spectral analysis of a biofield of the person.

Any negative (negative emotions, negative thought forms) is heavy power which has property, collects in power of a biofield. And even when a life situation and your state of mind already changed to the best the collected negative remains in a biofield around you and returns you to bad behavior. The biofield is power integrity, security and the atmosphere in which you live. In other words, it is your power lodge, your personal space which always is at you. And the house and the space it is necessary to keep clean (Figure 1).

Figure 1. Clean biofield of the person.

The clean equilibrium biofield of the person characterizes the following human qualities. Self-criticism — identification of mistakes and shortcomings of, analysis and assessment of negative sides in the activity, the thinking and behavior. Justice - execution due: it is right duties, work for remuneration, punishment for crime, etc.

Sincerity - lack of contradictions between real intentions and words. Keeness - ability to feel emotional both state of mind of other person and ability to help it. Truthfulness - spiritually moral commitment to the truth, fact, reality, reality. Politeness - ability validly and tactfully to communicate with people. Honesty - fidelity to the assumed obligations, sincerity before others and before by itself concerning those motivations by which the person is guided [6-7].

The white sparkling color of a biofield demonstrates sanctity of the person and characterizes the following his qualities [8]. Humility – vision the sins and sincere repentance, aspiration not to make them. Mildness – God's execution of Volya. Spiritual patience – to overcome the evil good. The love to itself — to lead completeness godlike life, to seek to carry out the highest calling and purpose. God loves the person, the person has the right to treat himself with love. Love to others – not to do the evil to others. "Love your neighbor as" (Matfey 22:39). Communication good luck – standing in a prayer. Love for God – worship is in good spirits and the truth.

3. Spectral analysis of biofield

On the basis of the GRV method – it is possible for gas-discharge visualization of radiations of a biofield of the person (by the Kirlian method) quickly and with high precision to find changes of field structures and potentials of power radiations of biological bodies (Figure 2). What allows to diagnose effectively diseases of the person at a donozologiya stage.

Figure 2. Biodiagnostics

Destructive radiations appear at the person as a result of action of its negative spiritual qualities or emotions: * the grief gives vibrations — from 0.1 to 2 hertz; * fear from 0.2 to 2.2 hertz; * offense — from 0.6 to 3.3 hertz; * irritation — from 0.9 to 3.8 hertz; * indignation — from 0.6 to 1.9 hertz; * the egoism — gives vibrations of at most 2.8 hertz; * irascibility (irascibility) - 0.9 hertz; * flash of rage — 0.5 hertz; anger — 1.4 hertz; * arrogance — 0.8 hertz; pride — 3.1 hertz; * neglect — 1.5 hertz; * superiority — 1.9 hertz; * pity — 3 hertz.

Researchers on physical medicine noticed long ago that positive people who lead a healthy lifestyle are not ill when the frequency of vibrations of their power field was included into a resonance with a frequency of vibrations of 8 hertz.

Throughout the millennia the frequency of vibrations (fluctuations in a second) our planet was 7.8-8.2 Hz. Physicists call it Schuman's frequency. It fluctuates within 8 hertz.

The resonance of standing electromagnetic waves with a frequency of 8 hertz of a biofield provides and supports a healthy condition of an organism. Health to the person is provided by the clean nature and spiritual and naturalistic practice of a healthy lifestyle [5].

Conclusion:

Spiritual and naturalistic practice and spectral diagnostics of a biofield of the person form the new direction of health care providing healthy longevity. The spectral analysis and photo visualization of a biofield help any person:

- it is better to understand the inner world, features of a warehouse of the personality;
- to notice dependence of the health on psychological emotional state;
- to see the impact which had by external factors on a physical, sincere and power state;

- to learn to control the psychological emotional state, to smooth consequences of external influences, to choose optimal solutions in difficult or responsible situations;

- to estimate how outside world and its influences influence a biofield.
